Gauge

8 sts x 11 rows = 4 inches (10 cm) in single crochet

Hat length may be adjusted by adding or subtracting rounds as needed.

A gauge swatch is vital for a well-fitting crochet hat. It determines stitch tension and measures the number of stitches and rows. Comparing it to the pattern's gauge ensures the final hat fits as desired. Adjust hook or tension if needed for a perfectly fitting hat.

Because the texture of this hat can only be worked in rounds the gauge will be based on a swatch of rows made in single crochet.

The number or rows is not needed for this swatch as you will be working the number or rounds based on a measurement and not a round count. But it is recommended to do at least 6 rows for your gauge swatch.

Notes

1. This pattern is worked in **continuous rounds**, which means you do not join at the end of each round.
2. Place a stitch marker at the beginning of the round and move it up as you go. This makes counting much easier, especially with super bulky yarn.
3. You'll start the hat using a **10 mm hook**, then switch to a **9.0 mm hook** partway through the pattern. This helps keep the fabric looking neat and consistent.
4. Each size follows the same basic steps. The only things that change are the stitch counts and number of rounds.
